School District Areas of Improvement and Planning - Indicators

Suspension/Expulsion by Race/Ethnicity (Indicator 4B)

Indicator not flagged at this time.

Disproportionate Representation by Race/Ethnicity (Indicator 9)

Indicator not flagged at this time.

Disproportionate Representation by Race/Ethnicity/Disability (Indicator 10)

Indicator not flagged at this time.

Timely Initial Evaluations (Indicator 11)

Indicator not flagged at this time.

Secondary Transition (Indicator 13)

Indicator not flagged at this time.

Graduation (Indicator 1)

Indicator not flagged at this time.

Drop Out (Indicator 2)

Indicator not flagged at this time.

Assessment (Indicator 3)

Indicator not flagged at this time.

Education Environments (Indicator 5)

Improvement and Planning Activity

The district is below the state average in Educational Environment - students inside the regular class 80% or more, 54.8% LEA/61.6% state; students inside regular class less than 40%, 23.7% LEA/10% state; students in other settings 9.5% LEA/4.4% state. This school year (2023-2024) we added eight special education classrooms to increase our district continuum of services. This included five Autistic Support classrooms at the elementary level and three Therapeutic Emotional Support classrooms at elementary, middle and high school. By having our students and classrooms in our district and having direct, district control over the classrooms, we can increase opportunities for our special education students to participate with their regular education peers in academic and social settings, as well as extracurricular activities. As a support to our staff, we continue to provide trainings to our administrative, professional and support staff related to behavioral supports, Autism and supplementary aids and services.

Parent Involvement (Indicator 8)

Indicator not flagged at this time.

Early Childhood Transition (Indicator 12)

Indicator not flagged at this time.

Post-School Outcomes (Indicator 14)

Indicator not flagged at this time.

Resolution Sessions (Indicator 15)

Indicator not flagged at this time.

Mediation (Indicator 16)

Indicator not flagged at this time.

School District Areas of Improvement and Planning - Monitoring

District has completed all monitoring corrective action/improvement plans.

Identification Method

Identify the District's method for identifying students with specific learning disabilities

Discrepancy Model

Building Name	AUN	Branch Number	RTI	Approved RTI Use
---------------	-----	---------------	-----	------------------

Non-Resident Students Oversight

1. Is your district currently a host district for a 1306 facility?

No

1. Describe the host's educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)

If the West York Area School District became a host for facilities under Section 1306, the district personnel would work collaboratively with the staff at the institution and the individuals who hold educational rights for the students in the placement. A district LEA would attend all IEP meetings. Least Restrictive Environment would be discussed and determined on an individual basis for students. This could mean that the student would receive instruction in the public school setting but could also mean that students would receive instruction at the institution. The full range of programming would be available for the student reviewing specific strengths and needs and a creative hybrid programming would be an option as appropriate. If the student requires a more complex educational program or services, the district may also recommend a placement located outside the institution and not within the West York Area School District such as a program operated by the Lincoln Intermediate Unit to ensure student needs are met.

2. Describe the district's procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?

The district would collaborate with the staff at the 1306 facility and would send a representative to serve as LEA at all IEP meetings. When student is ready to begin the transition process back to district or to a contracted educational placement, an individual plan will be created. This could include a gradual transition course by course or half day with supports in place to ensure a successful transition.

Incarcerated Students Oversight

1. **Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?**

No

1. **Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).**

The district, in cooperation with the Lincoln Intermediate Unit (LIU), operates the educational program in the local correctional institutions for all incarcerated students who are or may be eligible for special education services. LIU procedures are established and followed in order to notify school districts when school-age youth enter the facilities. School records are sent to the facility in order to identify students who would be eligible for special education services. Students may be evaluated while incarcerated if there is a reason to believe the youth may be disabled and in need of specially designed instruction. The school district works in conjunction with the LIU to complete the evaluation. Students are eligible for a diploma when the home school district determines the work completed by the student meets the school district criteria for graduation. The LEA (home district) takes responsibility to ensure FAPE is offered to each student who is eligible for special education within a correctional facility. The school district complies with Child-find obligations for school aged individuals.

Least Restrictive Environment

1. **Review the district's data for Least Restrictive Environment. Highlight areas of improvement.**

In reviewing the past 3 years of Special Education Data Reports (20-21, 21-22, 22-23), West York Area School District has not met the State Performance Plan (SPP) Targets for Indicator 5, Educational Environment. Factors contributing to this are, our district increased numbers in our overall enrollment of special education students with an increase of 59 special education students from the 2020-2021 school year to the 2022-2023 school year. Our percent of identified special education students increased from 17.4% to 18.9%. Our students with a primary diagnosis of Autism went from 12.3% to 17.3% in three years (from 61 to 96 students), with the state average of 13.2% for the 2022-2023 school year. The majority of that increase continues to come from Early Intervention students transitioning to Kindergarten and newly enrolled students. Our data for enrollment of students with primary diagnosis of emotional disturbance has decreased from 9.5% to, currently below the state average, with district at 7.2% and state average at 7.9% (22-23). Our IEP teams monitor and adjust based on student needs and provide. The student placement is carefully considered and chosen as the least restrictive environment. To address the need to meet the SPP target for Least Restrictive Environment, the district will provide trainings at building faculty meetings for special education, regular education and administrative staff. During these trainings, teachers and administrators will review the district obligations for providing the Least Restrictive Environment and Educational Placement for students with IEPs using the Basic Education Circular guidelines. The Special Education Data Reports will be shared to show our target of LRE in Indicator 5, Educational Environment. The Director, and Assistant Director of Special Ed/Pupil Services, Supervisor of Special Education and Instructional Advisors will review these expectations and engage in discussions at yearly IEP meetings to ensure the district is meeting the obligation set by PDE. West York Area School District uses a Multi Tier System of Support (MTSS) Team process at the all levels to implement interventions and support for students prior to consideration of special education interventions. In all buildings, the teachers work in teams to implement and document interventions, tier 1 and tier 2. If a student is not making progress, teachers refer to the Pupil Service Team. These teams analyze specific student data to determine remediation and interventions, which are first implemented in the general education environment. Ongoing monitoring of the student in the general ed environment is done to determine whether they need an increase or new tier 2 intervention. Finally, if the student is not making adequate progress with consistent research based interventions, an evaluation for special education services will be issued. Once it is determined that regular education cannot meet the identified needs of the student, the student is referred for testing to determine the educational disability and appropriate level of support required. The placement is based on the needs and supports required by the student, not by the disability category. The IEP team determines which program and what level of service is required to implement the IEP to meet the student's needs. Continual progress monitoring is in place to determine if the current placement is appropriate, or should be changed. The district's first consideration is to provide supplementary aids and services within the regular education environment before considering any removal from the regular education class. Only after a period of monitoring progress to see if there is sufficient achievement being made in a particular environment will a more restrictive environment be considered. Placement in a more restrictive environment would only occur if there had been a lack of progress noted over time. The IEP team meets annually (at minimum) to discuss the least restrictive environment for the student and the most appropriate program and placement.

2. **What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?**

The district utilizes the following universal academic practices: reading diagnostic tests, math diagnostic scores, curriculum-based assessments, state assessments, and historical performance on assessments. Teachers meet in teams to discuss student data and tier 1 supports that may be implemented. Universal behavioral practices include: monitoring office discipline referral and attendance data to identify trends and patterns and to provide interventions as needed. All students have access to their school counselor and adhere to MTSS schoolwide positive behavior expectations and reward system. A

universal behavior screener, the Student Risk Screening Scale-Internalizing/ Externalizing is completed by teachers three times per school year (fall, winter and spring) at the K-5 level.

3. **Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.**

At all levels the district uses a cooperative/collaborative model of instruction for the majority of the special education population. These students are subsequently monitored to assure they are making progress with this level of supportive intervention. By having the special education teacher work in collaborative and/or co-teaching partnerships with regular education teachers, the students have the advantage of receiving the skills of both a strong content teacher and intervention teacher. The district uses site based training through monthly academic collaborations, inservice days, early dismissals, and Title 2A training. Staff members participate in webinars offered through PDE and PATTAN as well as conferences and various trainings offered. The district also works closely with the IU 12 for training and consultation on a regular basis. The district has established many partnerships with agencies who also provide training opportunities and support for staff. To address the need to meet the SPP target for Least Restrictive Environment, the district will provide specific trainings for special education staff, regular education staff and administrators which will include Strategies and Interventions for Supporting Students with Autism in the Regular Education Classroom and Behavior Strategies and Interventions in the Regular Education Setting. During this training, teachers and administrators will review the district obligations for providing the Least Restrictive Environment and Educational Placement for students with IEPs using the Basic Education Circular guidelines. The Director and Asst. Director of Special Ed/Pupil Services, Supervisor of Special Education and Instructional Advisors will review these expectations and engage in discussions at yearly IEP meetings to ensure the district is meeting the obligation set by PDE.

4. **Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.**

Students with disabilities are provided with the opportunity to participate in extracurricular activities. Students who require additional supports and services to participate in extracurricular activities are provided those aids and services. Some of the supplementary aids include: extra practice time as needed, extra time with coach/mentor, visual cues, review behavior plans with coaches, and access to assistive technology, interpreters (for hearing impaired students), personal care assistants (for students who require such services during the school day), transportation (when students are unable to be transported via the typical school bus), and specialized apps.

5. **Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?**

Students whose home district is WYASD, but are placed in private institutions are able to participate in extracurricular activities such as sports and clubs, graduation. Transportation from the private institution to the district is arranged. In alternative education settings, students with disabilities are educated alongside non-disabled children.

6. **Discuss the district's need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)**

The district strives to meet the needs of each individual student regarding his or her disability and potential placement needs. We currently contract with the Lincoln Intermediate Unit 12, other LEAs, and other educational agencies to provide a full continuum of services and programming for our students. However, the district is continuing to expand our capacity within the district to meet the needs of our special education students. Over the course of the past five years we have expanded by adding 13 additional classrooms, with 8 added this school year (23-24). By establishing classrooms for elementary Autistic Support, K-12 Intensive Learning Support, HS Life Skills Support, Emotional Support and Therapeutic Emotional Support, we have considerably

reduced our number of contracted special education placements, specifically with the LIU 12. To assist with our rapid growth of special education services offered in district, we hired a Supervisor of Special Education this school year (23-24). In addition to this, we added a second Behavior Specialist this school year and increased from two to three psychologists last school year (22-23). We monitor closely the progress of our out of district placement students and use our behavior specialists and psychologists to conduct observations as we prepare to develop a transition plan for them to return to district programming. The district is looking at the continuum of services for other emerging disability categories to determine how to best meet the growing needs of the special education population in the district. Next school year we are adding a middle school Autistic Support classroom to support our elementary AS students as they transition to middle school. We will continue to examine all factors (cost, student enrollment, student need) that would impact the decision to return services currently offered by the LIU to the district. The district will also continue to examine ways to provide more co-teaching opportunities which will enhance student learning in the least restrictive environment.

Positive Behavior Support

Date of Approval

2021-04-20

Uploaded Files

Policy 113.2 Behavior Support.pdf

1. **How does the district support the emotional, social needs of students with disabilities?**

The district supports social and emotional needs of students by providing a social and emotional learning curriculum K-12. All students are able to access Tier 1 social-emotional and behavioral supports including: access to school counselors and participation in school-wide positive behavior support system and rewards. As part of Tier 2, students are able to receive school-based counseling services, individual meetings with the school social worker, check-in check-out with a staff member the student connects with, behavior intervention plans, home-school collaboration through meetings and continuation of outside services, school attendance improvement plans. More intensive services may include SAP (Student Assistance Program), STAT (Suicide Threat Assessment Team) and services through MHIDD (Mental Health- Intellectual Developmental Disabilities). In spring of 2021 a team of five, administrative and professional staff were trained in threat assessment training using the Comprehensive School Threat Assessment Guidelines. The district hired two full time school psychologists at the start of the 2021-2022 school year to replace our LIU contracted psychological services and a third school psychologist at the start of the 2022-2023 school year. This school year we expanded our special education continuum by adding three, district Therapeutic Emotional Support classrooms (Elem, MS, HS). Each TES classroom has a teacher, a teacher aide and a counselor within the classroom. Additionally, within the past three years we hired two behavior specialists to support our K-12 special education students with behavioral, social and emotional needs.

2. **Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.**

As per policy 113.2, "The Superintendent or designee shall provide regular training and retraining of staff in the use of specific procedures, methods and techniques, including de-escalation techniques, emergency responses, restraints and seclusions, that will be used to implement positive behavior supports or interventions in accordance with students' IEPs, Positive Behavior Support Plans and Board policy". WYASD uses CPI (Crisis Prevention Institute) for the foundation of de-escalation strategies and physical safety management techniques. At each level, a team of professionals are trained annually to maintain certification in CPI practices. All teachers at the elementary and secondary levels receive training in de-escalation strategies. Support staff also receive several hours of training pertaining to de-escalation strategies and behavioral supports. As part of the induction process new teachers are also trained in de-escalation strategies each year. This school year, 2023-2024 we have trained select building professional and paraprofessional staff in Safety Care to assist with our specific autism population needs. Additionally, individual consult and observations are encouraged by WYASD Instructional Advisors to be able to assist General Education and Special Education Teachers with behavioral supports in their classrooms. For students that require an FBA, the IEP team will convene to complete this process and develop a positive behavior support plan for the student to provide additional interventions for students. We have two district behavior specialists that provide support to our special education students and the staff that work with them.

3. **Describe the district positive school wide support programs.**

All district school buildings utilize a positive behavior support program. Staff members have participated in trainings with the local intermediate unit, in order to develop a school-wide positive behavior support plan and to provide academic, behavioral, and social-emotional supports. The MTSS committee teams meet monthly to discuss schoolwide discipline trends and to determine positive behavior incentives and rewards. The behavioral team monitors office discipline referral and attendance data to identify trends and patterns to provide interventions in order to improve behavior and have more students participate in positive school wide rewards.

4. **Describe the district school-based behavior health services.**

WYASD has school based mental health supports through Pennsylvania Comprehensive Behavioral Health (PCBH) for grades K-12. The district also has a school social worker that supports students K-12 as well as a Social Service Coordinator that provides resources to students and families as well as coordinates services from outside agencies. We have Student Assistance Program and have district trained employees at all levels. In addition to this, we have Laurel Life Transition classrooms for K through grade 12. Not only does the Laurel Life team provide behavioral and trauma services to the students in their program, they also observe students and provide feedback to the teachers, provide therapy, and consult with FBA/PBSP development. These classrooms support students who have experienced trauma and all staff are trained in trauma informed care. We have an assigned MH-IDD caseworker who is in the district one day per week and can assist families referred to services in the community.

5. **Describe the district restraint procedure.**

As per policy 113.2, "Restraints to control acute or episodic aggressive behavior may be used only when the student is acting in a manner that presents a clear and present danger to the student, other students or employees, and only when less restrictive measures and techniques have proven to be or are less effective". For students who end up requiring the use of a Physical restraint, the use of CPI or Safety Care is listed within the IEP. Social skills instruction will also be included to instruct students on self-regulation and coping skills. When a student requires a restraint, the parent is immediately notified. The IEP team will set up a meeting to review the incident within 10 days. It is also possible to waive the meeting if parents agree to do so. However, our preference is to meet and discuss. A restraint report is completed to document the incident and submitted to the state. At the IEP meeting, the review of the goals and positive behavior support plan will occur, along with any revisions to better support the needs of the students. If behaviors continue to demonstrate a pattern, the team will make a determination for a more supportive placement.

Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

When faced with a student whose needs surpass the placement options available at West York Area School District, the district works collaboratively with Lincoln Intermediate Unit 12, various private schools, Child and Adolescent Service System Program (CASSP), Children Youth and Families, Probation, Service Access Management, Student Assistance Program and MH-IDD to find and determine appropriate placements for students. In addition to this, the district collaborates with partial hospitalization programs to meet the intense mental health needs of specific students. IEP meetings include school and agency personnel, along with the parents and students. The district utilizes a team approach to resolve and locate educational placements and services for hard to place students with disabilities. Instruction Conducted in the Home is the most restrictive option of the continuum of special education placements and is only considered when a student has severe medical and behavioral needs that cannot be met in any other setting. The IEP team has ongoing communication to ensure the student is receiving FAPE equal to his or her non-disabled peers, unless this amount of instruction would jeopardize the child's health or welfare.

Affirmation Special Ed 2022.pdf

- x There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- x The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- x The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- x The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- x The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- x The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.

Superintendent/Chief Executive Officer

Todd M. Davies
